Johnson & Johnson Vision Introduces New ACUVUE® OASYS MULTIFOCAL with PUPIL OPTIMIZED DESIGN and Expands the ACUVUE® OASYS Portfolio of Offerings for Patients with Presbyopia

- Newest member of the ACUVUE® OASYS Brand Family designed to deliver crisp, clear reliable vision at all distances, regardless of age or refractive error¹.
- The new lens is designed for superior visual performance and a more precise fit^{∞1}.

JACKSONVILLE, FL – 03/15/2021 – Johnson & Johnson Vision*, a global leader in eye health and part of the Johnson & Johnson Medical Devices Companies**, today introduced a new eye care option for patients with presbyopia: ACUVUE® OASYS MULTIFOCAL Contact Lenses with PUPIL OPTIMIZED DESIGN. The new lens is now available in the U.S. and Canada. ACUVUE® OASYS MULTIFOCAL Contact Lenses with PUPIL OPTIMIZED DESIGN expands the products from the ACUVUE® OASYS portfolio, which includes lenses unbeaten in comfort across 29 clinical trials[§] and delivers parameter optimization at 100% vs. less than 2% for the leading competitor^{x1}. The ACUVUE® OASYS MULTIFOCAL is built on the ACUVUE® OASYS 2-Week platform. It includes the PUPIL OPTIMIZED DESIGN technology, used in the 1-DAY ACUVUE® MOIST MULTIFOCAL, that is designed for crisp, clear, reliable vision at all distances, enabling patients with presbyopia to see distant, intermediate, and near objects¹.

[§]www.clinicaltrials.gov is a website maintained by the NIH. The 29 clinical studies evaluated subjective comfort as a primary or secondary endpoint for ACUVUE® OASYS Brand 2-Weekly Family and for ACUVUE® OASYS 1-Day with HydraLuxe® Technology. Review conducted as of November 12, 2020.

^xCompared to the leading competitor's design; technology optimized for both parameters of refractive error and add power.

¹ JJV Data on File 2020. ACUVUE® PUPIL OPTIMIZED DESIGN TECHNOLOGY: JJVC Contact Lenses, Design Features, and Associated Benefits.

ACUVUE® OASYS MULTIFOCAL uniquely combines three technologies: PUPIL OPTIMIZED DESIGN, Hybrid Back Curve Technology and a Proprietary Embedded Wetting Agent to create a lens designed for performance and comfort¹.

“This ACUVUE® OASYS MULTIFOCAL contact lens brings a long-awaited solution to patients with presbyopia who have been looking for continuous, clear and comfortable vision at all distances,” said Xiao-Yu Song, MD, PhD, Global Head of Research & Development, Johnson & Johnson Vision^{***}.

Globally, 1.9 billion people have presbyopia², which is the gradual loss of the eyes' ability to focus on nearby objects. Presbyopia usually becomes noticeable for patients in their early to mid-40s and continues to worsen until around age 65³.

“The new ACUVUE® OASYS MULTIFOCAL lenses are a breakthrough for patients with presbyopia because instead of fitting the patient to the lens, we can fit the lens to the patient¹,” said Susan J. Gromacki, OD, MS, FAAO, FSL^{****}. “Patients can be easily and quickly fitted, which is great given that this is a multifocal lens.”

Available in both daily disposables and reusables, ACUVUE® offers multifocal lenses that have the same design, parameters, and fit process across modalities, enabling Eye Care Professionals (ECPs) to offer a more personalized solution for patients^{∞1}. ECPs fitting patients for the ACUVUE® OASYS MULTIFOCAL can also use the free [ACUVUE® Fit Calculator](#) to quickly and easily find the optimal trial lens power for patients.

vision, and interventional solutions, we are helping to save lives and paving the way to a healthier future for everyone, everywhere.

Important information for contact lens wearers

ACUVUE® Contact Lenses are available by prescription only for vision correction. An eye care professional will determine whether contact lenses are right for you. Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and the lens care instructions provided by your eye care professional. Do not wear contact lenses if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, remove the lens and contact your eye care professional immediately. For more information on proper wear, care and safety, talk to your eye care professional and ask for a Patient Instruction Guide, call 1-800-267-5098 or visit acuvue.ca.
